Guilherme Souza

Software Engineer & Full-Stack Developer

Belo Horizonte, MG | github.com/yG2y | | linkedin.com/in/g2souza | | Latest version of this Resume | | Versão em Português |

> *Software Engineer (7th semester, PUC Minas) with* **4+ years of hands-on experience** *in full-stack engineering, application architecture, and system integration. Currently at* **Vale** *(one of the world's largest mining companies), acting as a strategic bridge between engineering and business stakeholders: defining technical requirements, prioritizing deliverables, and building robust enterprise solutions using* **Java/Spring Boot, Python**, *and* **Power Platform**. *Proven track record across software engineering internships (Vale, Teknisa, Recivil) paired with high-stakes decision-making and leadership experience as an Army Reserve Officer. Career target:* **Software Engineering** *with a focus on* **Solution Architecture** *and large-scale distributed systems.*

PROFESSIONAL EXPERIENCE

Software Engineering & Data Analytics Intern

Nov 2024 – Present

Vale · Belo Horizonte, Brazil

- Served as **technical focal point** between outsourced vendor teams, stakeholders, and the Environmental Licensing Board, governing requirements, scope, and quality assurance across **7 operational products** (process automation, data pipelines, and executive dashboards)
- **Technical autonomy in system maintenance and troubleshooting**, independently diagnosing and resolving business logic bugs and data inconsistencies, accelerating turnaround time and minimizing vendor dependency
- Engineered enterprise applications and automated workflows using **Power Apps, Power Automate, and SharePoint**, incorporating relational data models and complex business rules
- Delivered technical support and root-cause analysis for **2 internal Vale web platforms**, ensuring operational stability and architectural alignment with corporate IT teams
- Data engineering and analytics using **Power BI, Python, and Excel**, turning environmental licensing operational data into strategic executive dashboards and actionable metrics

Power Apps | Power Automate | Power BI | Python | VBA | JavaScript | SharePoint | Scrum

Teaching Assistant — Interdisciplinary Work: Applications for Business Processes

Sep 2024 – Jun 2026

PUC Minas · Belo Horizonte, Brazil

- Mentored students in Web Interface Development integrated with Databases following **BPMN** documentation
- 100% student return rate across semesters, each student attended at least 3 sessions, reflecting consistent and effective technical support

Fullstack Development Intern (PHP/TypeScript)

Aug 2024 – Nov 2024

Teknisa · Belo Horizonte, Brazil

- Developed features for **Techfood**, a collective meal management system using PHP, Vue 3, TypeScript, and SQL in a microservices architecture with RESTful APIs
- Gathered requirements, performed periodic testing, maintenance, and collaborated on architecture decisions

PHP | Vue.js 3 | TypeScript | SQL | Microservices | REST API

Fullstack Development Intern (Java/Vue)

May 2022 – Jun 2024

Recivil — Civil Registry Officers' Union · Belo Horizonte, Brazil

- Engineered and maintained an asset management system using **Java Spring Boot, Vue 2**, and SQL
- Acted as a technical interface with client institutions and third-party service providers, contributing to technical decision-making, integration requirements, and corporate service alignments

Java | Spring Boot | Vue.js 2 | SQL

Reserve Officer Candidate, Logistics Service

Feb 2021 – Dec 2021

CPOR Belo Horizonte / Brazilian Army

- Led a team of **35 people** under military rigor and pressure, strengthening responsibility, communication, and operational routine management
- Served as **Guard Commander**, making decisions in situations involving high responsibility and real operational risk

Java | Spring Boot | RabbitMQ | Docker | AWS Lambda | Python | Flutter | Dart | PostgreSQL | Microservices

Task Management System with Java Spring Boot + React | Full CRUD with Cloud API Deployment

Public

Task management system with full **CRUD** — deadline enforcement, priority levels and status control. Built with **Java 21, Spring Boot 3, Hibernate/JPA, PostgreSQL** (HikariCP connection pool) and **React** frontend. API deployed to production on **Render** with **OpenAPI 3 (Swagger UI)** documentation.

| Live Demo (Swagger) | | github.com/yG2y/lab-des-soft | | DeepWiki — Architecture Docs |

Recivil Asset Management System Private

Intranet software for asset control built with **Java, Spring Boot, Vue 2, and SQL**.
