Guilherme Souza

Data Scientist & Software Developer

Belo Horizonte, Brazil github.com/yG2y linkedin.com/in/g2souza

> *Data Scientist Jr with **3+ years of experience** in data analysis, modeling, and data-driven automation. At **Vale**, I transform operational data from multiple sources into strategic indicators and insights using **Python, SQL, Power BI, and Advanced Excel**, developing analytics solutions that directly support leadership decision-making. I have a solid foundation in **statistical analysis, large-scale data manipulation, and model development**, with a results-oriented profile and affinity for data-driven dynamic environments — such as the marketing and media ecosystem at ETUS. Pursuing a B.Sc. in Software Engineering at PUC Minas (7th semester).*

PROFESSIONAL EXPERIENCE

Data & Process Automation Analyst
Nov 2024 – Present

Vale · Belo Horizonte, Brazil

- Served as **technical focal point** between outsourced team, stakeholders, and the Environmental Licensing Board — managing requirements, scope, and delivery quality across **4 systems (Power Apps + Web)**
- Achieved a **92% bug resolution rate** independently, reducing dependency on the contracted vendor
- Delivered **100% bug coverage on VBA automations** requested by the Board, ensuring operational continuity of critical management tools
- Implemented solutions in **Power Apps, Power Automate, and SharePoint**; data processing and business rule modeling
- Provided technical support for **2 internal Vale web systems**: fault diagnosis, maintenance, and alignment with corporate IT teams
- Data analysis and BI using **Power BI, Python, and Excel**, converting operational data into strategic indicators

Power Apps | Power Automate | Power BI | Python | VBA | JavaScript | SharePoint | Scrum

Teaching Assistant — Interdisciplinary Work: Applications for Business Processes
Sep 2024 – Present

PUC Minas · Belo Horizonte, Brazil

- Mentored students in Web Interface Development integrated with Databases following **BPMN** documentation

Fullstack Developer PHP/TypeScript
Aug 2024 – Nov 2024

Teknisa · Belo Horizonte, Brazil *(Left for an approved offer at Vale)*

- Developed features for **Techfood** — a collective meal management system — using PHP, Vue 3, TypeScript, and SQL in a microservices architecture with RESTful APIs
- Gathered requirements, performed periodic testing, maintenance, and collaborated on architecture decisions

PHP | Vue.js 3 | TypeScript | SQL | Microservices | REST API

Fullstack Developer Java/Vue
Jun 2022 – Jun 2024

Recivil — Civil Registry Officers' Union · Belo Horizonte, Brazil

- Built an asset management system using **Java Spring Boot, Vue 2**, and SQL
- Gathered requirements, performed periodic testing, maintenance, and supervised the IT department

Java | Spring Boot | Vue.js 2 | SQL

Teaching Assistant — Interdisciplinary Work: Web Interface Development
Aug 2023 – Dec 2023

PUC Minas · Belo Horizonte, Brazil

- Mentored students in Web Interface Development integrated with HTML5, CSS3, JavaScript, jQuery, Bootstrap

TECHNICAL SKILLS

LANGUAGES
Java | Python | TypeScript | PHP | JavaScript | C | SQL | VBA

FRONTEND
Vue.js 2/3 | React | Next.js | HTML5 | CSS3/SCSS | Tailwind | Bootstrap

BACKEND & CLOUD
Spring Boot | Maven | PostgreSQL | Supabase | REST API | Microservices | Docker | RabbitMQ | AWS Lambda | Flutter | Render

DATA & PLATFORMS
Power BI | Power Apps | Power Automate | SharePoint | Advanced Excel

TOOLS & METHODS
Git/GitHub | Swagger | BPMN | Scrum | Software Architecture

SOFT SKILLS

- Requirements Management
- Project Coordination
- Business Analysis
- Technical Communication
- Technical Leadership
- Decision Making

EDUCATION

B.Sc. in Software Engineering
PUC Minas
2022 – 2026 (7th Semester)

Reserve Officer — Logistics
Brazilian Army
Feb 2021 – Dec 2021

CERTIFICATIONS

- Java Basic Certificate
- Red Hat System Administration I (RH124)

LANGUAGES

Portuguese	Native
English	Intermediate — Cultura Inglesa

PROJECTS

Distributed Logistics System `Public`

Full distributed system with **5 Java Spring Boot microservices**, JWT API Gateway, **RabbitMQ** event messaging, **AWS Lambda simulation** (Python), and **Flutter** mobile app — entire infrastructure orchestrated via Docker Compose: **PostgreSQL**, RabbitMQ, and all services running as independent containers on the same Docker network. Includes end-to-end automated order tracking with event-driven notifications.

github.com/yG2y/Sistema-de-Logistica-Distribuida · DeepWiki — Architecture Docs

Java · Spring Boot · RabbitMQ · Docker · AWS Lambda · Python · Flutter · Dart · PostgreSQL · Microservices

Task Management System with Java Spring Boot + React | Full CRUD with Cloud API Deployment `Public`

Task management system with full **CRUD** — deadline enforcement, priority levels and status control. Built with **Java 21, Spring Boot 3, Hibernate/JPA, PostgreSQL** (HikariCP connection pool) and **React** frontend. API deployed to production on **Render** with **OpenAPI 3 (Swagger UI)** documentation.

Live Demo (Swagger) · github.com/yG2y/lab-des-soft · DeepWiki — Architecture Docs

Recivil Asset Management System `Private`

Intranet software for asset control built with **Java, Spring Boot, Vue 2, and SQL**.
